About Me

I am a designer and developer with a founder driven mindset, focused on building intuitive, user centered digital experiences that combine strong design with reliable engineering. I work at the intersection of product vision, design thinking and development execution to turn ideas into scalable solutions. I value leadership, collaboration and continuous growth, with a focus on creating products and services that deliver measurable impact for users and organisations.

Education

Degree:

B. Tech. in Computer Science and Engineering
Silver Oak College of Engineering and Technology
Graduation Year: 2026

Scores/Grades:

- High School: 67%
- Last Semester CPI: 8.49
- No academic backlogs

Languages:

- Gujarati
- Hindi
- English

Experience

- Graphic Designer | TEDxSilverOakUniversity | September 2023
  - Led collaborative design initiatives to deliver visually compelling graphics for TEDx events.
  - Strengthened event visual identity through innovative concepts while meeting strict timelines with consistent quality.
- Secretary | Silver Oak University IEEE Computer Society Student Branch Chapter | 2024
  - Managed structured documentation including minutes, reports and official correspondence.
  - Coordinated meetings and events while serving as the key communication link for internal and external stakeholders.
- Secretary | Silver Oak University IEEE Student Branch | 2025
  - Oversaw branch wide communication across teams and committees to ensure clarity and coordination.
  - Developed strong people management, public communication and organisational skills through continuous collaboration with members, faculty and external professionals.
- AI Intern | Sahana System Limited | November 2024 – February 2025
  - Worked on production level AI and machine learning projects involving data processing, model training and evaluation.
  - Collaborated with cross functional teams to implement and deploy ML driven solutions using supervised learning, NLP and predictive analytics techniques.
- Founder & Director | Dot. | January 2026 - Present
  - Establishing Dot. as a web development focused company delivering modern scalable and performance driven web solutions.
  - Leading project planning, development workflows and client coordination to ensure high quality and reliable product delivery.
- AI & ML Intern | Sahana System Limited | January 2026 – Present
  - Working on end to end machine learning workflows including data collection, data preprocessing, model training, evaluation and optimisation.
  - Implementing supervised and unsupervised learning algorithms for real world problem statements.

Skills

Technical Skills (Learning):

- Python Language
- HTML5
- CSS3
- JavaScript
- C Language
- Java Language
- React

Designing Skills:

- UI/UX Designing: Figma, Framer, Wix Studio, WordPress
- Graphic Designing: Adobe Illustrator, Adobe Photoshop, Adobe After Effects, Canva

Soft Skills:

- Leadership
- Adaptability
- Team Management
- Logical Reasoning
- Interpersonal skills
- Content Writing

Projects in Progress

✳ Noobs Tech

- A student founded technology venture envisioned to deliver services across multiple domains.
- Focused on building simple, scalable and meaningful solutions, tailored for students, individuals and growing businesses.
- Driven by the belief that learning and execution should go hand in hand through ownership, accountability and real world impact.

✳ Face Recognition Based Attendance System

- Developing an automated identity recognition system using deep learning based face recognition to detect and identify registered users in real time.
- Designing a pipeline that captures frames from CCTV cameras, performs face detection, generates embeddings and matches them against a database of registered members.

✳ Chair Occupancy Detection System

- Implementing an AI based computer vision system to detect chair occupancy in real time using object detection models.
- Evaluating modern detection architectures such as YOLO and transformer based models like DETR for accuracy and inference performance.

✳ IEEE Global Connect Platform

- Developing a web platform that enables current and past members of the IEEE Student Branches to connect, collaborate and share professional opportunities.
- Designing features such as alumni networking, communication channels and event updates to strengthen the student branch community.

Blogging and Writing

I actively write blogs on Medium to document my learnings, reflections and personal experiences. Writing helps me organise my thoughts clearly and improves how I communicate ideas with others. I explore and write about the concepts, technologies and ideas I encounter while learning and experimenting across different domains.
